

mpengo Service Sheet 4.1: A Quick Start Guide

Welcome to mpengo ServiceSheet! This app is targeted at the service industry where checklists are used to capture information about any process that is performed for a client. The process can be as simple as a multi-point inspection and as complex as the user needs. You are even able to add charges and invoice the customer.

This app allows users to:

- Define answers to be used for different service sheets
- Define additional questions to link to a service sheet design
- Define a simple service check list of questions by one or more categories
- Schedule the service sheets
- Capture information for each of the questions on the service sheet
- Print, Email, Text and even Air Drop (if compatible) simple reports to record, and manage the information captured on the device.
- Add charges to the service sheet

Support:

We're here to help any time you need us. We're consistently rated among the top support organizations in North America and if you ask us a question, you'll find out why. You can expect a quick reply.

To reach us, simply tap the button labeled **[Support]**. Enter your subject & question, tap [Send], and our Support folks will answer you quickly.

For a Guide, send Support an email requesting the Quick Start Guide. We also have a more detailed manual if you desire. Just let us know and we will send you a link!

App Buttons and functions:

Generally, the app uses the following conventions:

[Actions] button (when in Portrait mode) – Displays the menu items

[<...] - return to the previous screen or menu.

[Done] – saves your work and returns you to the previous screen.

[Add] – tap to add a new record, line, or other piece of information.

[Delete] – tap to display a list of records that can be deleted.

[Order: Ascending] button – Tap to choose the sort order for the Service Sheets (Descending, Ascending, Today only)

[Close Sheet] – tap when finished to close the Service Sheet. The Service Sheet will be in Customer History and can be reopened within 24 hrs.

[Reorder] button – tap and hold to move and rearrange the order

Print – tap to preview then access print, email, or share button

Photos – tap to add up to 8 photos by using the camera or accessing your photos app.

Legend – tap to view the answers legend for the open service sheet

[Share] icon – Tap to share (mail, message, air drop and more)

Support – Tap to send Support an email

ServiceCall – Tap to access Service Call Actions

Sample Service Sheet

Tap the Customer name, date, or tech name to change or reassign

Tap to enter Customer or Tech Signature.

Tap on Invoice button to review or enter charges.

Tap on an Action/Question under each Category to enter notes.

Tap on an answer choice for the question or tap clear to remove your selection and any notes.

Enter any notes or comments.

Select any additional techs.

Enter answers for additional Questions.

General: Options-Shared App Options: Setup the parameters for using the shared app options between Service Call and Service Sheet.

- **Registered Apps:** Displays the list of registered apps and any iPad Prefix you may have setup for the call numbers in each app

General: Shared App Options-Service Sheet Options:

- **Layouts:** select on or more layouts to be presented as a list for the user to select when requesting a new service sheet form the other apps sharing the sandbox.
- **Tech:** Tech to use as the default when creating a new service sheet from the other apps sharing the sandbox.
- **Disable Invoicing for sheets associated with a call:** We recommend setting the option ON to disable invoicing for sheets associated with a call since most calls will include charges for the work performed. If you are using Service Sheet for other activities not related to Service Call, these sheets call can still have charges attached to the sheet.

General: Shared App Options-Service Call Options:

- **Email Service Sheet PDF when sending email for Service Call:** Turn ON to email the Service Sheet when emailing the Service Call. When you email the Service Call the Service Sheet app will open to also email the Service Sheet associated with the call.
- **Use Current Date/Time:** Turn On if you want to use the current date/time when creating a new service sheet from Service Call.

Hide Invoicing Buttons		
Hide Invoicing Buttons on Service Sheet when there are no existing charges; all invoice settings and reports will still be visible.		

Invoicing: Settings

- **Price / Rate Categories:** All rates/prices are separated into 5 categories. You can change the default categories and short form here.

The screenshot shows the 'Price Categories' settings screen. It has a header bar with a back arrow, 'Settings', 'Price Categories', and 'Done'. The main area is divided into two columns: 'Price/Rate Categories' and 'Short Form'. Each column has five input fields for 'Materials', 'Labor', 'Consumables', 'Travel', and 'Other'. Below these fields is a light green box with the text: 'All of the rates and prices are separated into five categories; the charges for an invoice will be summarized into these categories.'

- **Pricing Options:** By default Service Sheet uses the 'Rate/ Unit Price' from the rate table. To use a cost and markup percent turn ON the option and enter a ' Markup Percent'.

The screenshot shows the 'Pricing Options' settings screen. It has a header bar with 'Actions', a back arrow, 'Setup', 'Pricing Options', and 'Done'. On the left is a sidebar menu with 'Primary Tasks' (Home, Reports, Customers & Service History), 'Setup' (General, Invoicing, Layouts / Templates), 'Tools & Tutorials' (Backup, Sync, and Export, Tutorials), and 'Tutorials'. The main area has a text description: 'Service sheet uses the 'Rate / Unit Price' from the rate table. Turn on this option to instead use Unit Cost and Markup Percent to calculate a rate/price.' To the right of this text is a toggle switch that is currently turned ON (green). Below this is a label 'Markup Percent' followed by an input field containing '0.00'.

- **Tax Rules:** Enter the tax percent and description. Enter your Registration number if applicable.

The screenshot shows the 'Tax Settings' screen. It has a header bar with 'Actions', a back arrow, 'Setup', 'Tax Settings', and 'Done'. On the left is the same sidebar menu as in the previous screenshot. The main area has a table with two columns: 'Description' and 'Tax Percent'. There are two rows: 'Tax 1 Sales Tax' with a value of '6.00' and 'Tax 2 Tax 2' with a value of '0.00'. Below the table is a toggle switch for 'Tax 2 is calculated on Goods plus Tax 1', which is currently turned OFF. Below the toggle is a 'Registration Number' field with the value 'ML 1234566'. At the bottom is a light green box with 'Tips:' and several bullet points: '- U.S.: Tax 1 = use composite rate if applicable. Tax 2 is usually blank', '- U.K., E.U.: Tax 1 = VAT, Tax 2 is usually blank', '- Canada: Tax 1 = HST/GST, Tax 2 = PST (if applicable)', '- Insert the rate you use most often. If you bill from different localities, you can adjust tax rates during billing', and '- Canada (PEI): turn ON Tax 2 switch - your province requires it'.

Invoicing: Tables – Rates: tap to add or delete rates or modify existing rates. Rates are sorted by category.

- To add a rate, select the category and then tap **'Add'** on the toolbar on the bottom of the screen.
- **Rate/Price Code** (alpha/numeric): enter a short code for the item. This could be a part number or an abbreviation of the description. (Items are sorted by this code and each one must be unique; numeric codes will be displayed before alpha codes in the list).
- **Description:** Enter a brief description of the item.
- **Rate / Unit Price:** Enter the price for the item (Do NOT enter dollar signs when entering the price).
- **Item is subject to Tax:** Turn flag ON if the item is taxable. Turn OFF if it is not a taxable item.
- **Cost:** Enter the Cost if applicable. If you have 'Markup' turned ON in Pricing Options and have a unit cost entered for the item the Cost will be used.
- Press **Done** to save the item and return to the list.

The left screenshot shows the 'Rates' screen with a list of items categorized by 'Mat', 'Lab', 'Consum', 'Trav', and 'Oth'. Items listed include 'HP SW' (Heat Pump Switch) with a price of 35.00 and 'PLUG' (Plug) with a price of 15.00. An 'Add' button is at the bottom.

The right screenshot shows the 'Rates/Prices' form for the 'Materials' category. It includes input fields for 'Rate/Price Code', 'Description', 'Rate / Unit Price' (set to 0.00), 'Item is Subject to Tax' (a toggle switch currently turned on), and 'Cost' (set to 0.00).

Invoicing: Tutorials:

- Create / Import – Rates: an overview of the process to create or import rates.

The screenshot shows a tutorial screen titled 'Tutorial: Create / Import - Rates / Prices'. It displays a 'Rates / Price Categories' screen with a table of categories and a list of default categories.

Price/Rate Categories	Short Form
Materials	Mat
Labor	Lab
Consumables	Consum
Travel	Trav
Other	Oth

All of the rates and prices are organized into this categories. Any changes for an invoice will be categorized into these categories.

You can manually enter your Rates/Prices or create an Excel template to import into the app. Rates/Prices are organized by Category. These Category descriptions and Short Form can be changed in Settings for Invoicing - Price / Rate Categories, if you wish.

The Default Categories are:

1. Materials
2. Labor
3. Consumables
4. Travel
5. Other

For a more detailed tutorial, tap Support and ask the Support folks to send you a PDF tutorial that leads you through the app in greater detail!

Backup, Sync, and Export:

Backup / Restore:

- Tap '**Backup**' to create a backup of your data then tap to select the backup and email it to yourself for safekeeping by tapping the share button or email button depending on your iPad. If you change iPads you will then have a backup file to import into the App on your new device. In case of data loss you can also restore a backup or safety backup by selecting the one you want to restore and tapping 'Restore'. (Safety backups are created whenever you import a file or restore a backup).
- **Note:** Backups should be done on a regular basis and emailed to yourself. Then, occasionally Clean Up the old backups and safety backups in the app to save space by tapping 'Cleanup'. The 'Clean up' feature also has an option to 'Only delete the safety backup files'.

Synchronize Configuration:

- Send a copy of your configuration information from one iPad to another and update if not used in an active sheet. You have the option of choosing All or Selected Data.

Synchronize Layouts:

- Send information for selected Service Sheet Layouts (including answers, categories, and additional questions) from one iPad to another and update if not used in an active sheet.

Export Data:

- Export Data to your PC in a tab-delimited txt file. Choose from Invoice Register, Invoice Register w. Details, Customer List and Rates/Prices.

Tools	Support

USING MPENGO SERVICE SHEET

Components for creating a new Service Sheet (Layouts / Templates)

Each Service Sheet includes:

- The type of **Answers** to use in response to each action / question.
- A list of **Additional Questions** to record information on the service sheet (**optional**).
- **Layout** template of the categories and actions or questions for your checklist.

Setup: Layouts / Templates	Support
Options on the Sheet	
Answers	26
Define the list of answers to be used by a layout. All actions/questions in a layout can use the same answers; each category in the layout can override the layout and use different actions/questions.	>
Additional Questions	23
Each layout can include up to 10 additional pieces of information. This information is collected when a service sheet is scheduled and/or when the answers are entered.	>
Layout a Service Sheet	
Create Service Sheet Layout	68
Create the new layout for a service sheet that can include up to 999 actions/questions grouped into one or more categories.	>
Tutorials	
Tutorial - Creating a New Layout	
A tutorial showing the process for creating a new layout for a service sheet.	>

Step 1: Create the **Answers** (responses to questions / actions) to be linked to the Layout.

- Tap **'Add'** to create a new answer sheet.
- **Short Name:** Enter a short name for the Answer sheet.
- **Description:** Enter a Description.
- **Number of Choices:** Select the number of answers you will use (2, 3, 4).
- **Automatic Notes for answers other than the first:** Select whether to have the notes screen pop up automatically when filling out the service sheet.
- **Print explanation of answers at bottom of form:** Select whether a legend should be printed on reports to explain the codes.
- **Choice Code & Help Text:** Enter a short code and description for each answer. Keep answer code short (8 characters or less) so the text will fit on the button. These codes can be alpha or numeric.

(**Note:** you can have more than one set of answers that can be used in a Layout. When creating the layout you link a default set of answers but when entering the Categories you will have the option of overriding the default set of answers with another set or the option to add alpha/numeric fields.

Step 2: (Optional) **Additional Questions** you may want to ask on the Service Sheet. The answers can be alpha or numeric. (**Note:** by selecting 'Text' the Alpha keyboard will pop up and by selecting 'Number' the numeric keyboard will pop up.)

- Tap **'Add'** to create a new list of Questions.
- **Short Name:** Enter a short name for the list of Questions.
- **Description:** Enter a description.
- Tap **+** to add a field.
- **Field Label:** Enter a short phrase for the question.
- **Type:** Identify whether the answer is text or number.

Step 3: Creating the Service Sheet Layout

- Tap **'Add'** to create a new Layout.
- **Short Name:** Enter a short name for the layout. (**Note:** when pressing enter or tapping in the Description field you will have the option to 'Copy' from an existing layout and then change the Description and any other info on the new layout).
- **Description:** Enter a description to identify the layout.
- **Status** – An 'Active' status will display the layout in the list of Service Sheets available to be used. 'Disabled' will remove them from the 'Available list'.
- **Answers:** select the answers to be used for the layout by tapping the magnifying glass or X to clear your selection.
- **Default Answer** (optional): you can select a default answer to be used for the layout. Tapping the Clear button will remove your selection.
- **Additional Questions** (optional): select the Additional Questions (if any) to be used for the layout by tapping the magnifying glass or X to clear your selection.
- **Customer Signature, Tech Signature Required and Require all Answers** can be set by individual layout. (If you wish to have these options mandatory on all layouts you can choose this in General – App Options).
- **Repeat Method:** The repeat method option is used to define how to duplicate the questions in a category.

Values:

None (Default):

Each category will appear in the layout only once.

Category:

Each category can be repeated 1 or more times.

Layout:

The entire layout will repeat the number of times specified in the 'Repetitions' field.

Groups:

When one or more consecutive categories has a repetition greater than 1, they will repeat as a group. All categories in the group will appear in the layout one after the other and then the entire group will be repeated the number of times defined in the repetition value for each category.

Example: Servicing HVAC Units

Note: To better identify which 'Outdoor Unit' and 'Equipment Info' or location of unit we suggest the first question under the category be Description or Location. This will allow the tech to identify which one he is working on.

▪ **Repeat Method: Category**

In the category definition enter 3 as the number of repetitions for each of the two categories 'Outdoor Units' and 'Equipment Info'.

When the sheet is printed or displayed, the categories will appear in the following order: Outdoor Units 1, Outdoor Units 2, Outdoor Units 3, and then Equipment Info 1, Equipment Info 2, Equipment Info 3, using all the same questions.

▪ **Repeat Method: Groups:**

In the category definition enter 3 as the number of repetitions for each of the two categories 'Outdoor Units' and 'Equipment Info'.

When the sheet is printed or displayed, the categories will appear in the following order: Outdoor Units 1, Equipment Info 1, Outdoor Units 2, Equipment Info 2, Outdoor Units 3, Equipment Info 3, using all the same questions.

- **Charges button:** Tap if you wish to add default charges for this Layout.
Note: if you wish to hide the Invoice button from your service Sheet then go to Invoicing section and turn ON Hide Invoicing buttons).
- **Define Categories:** tap the + sign to add a new category. Enter a description for the category.
Value: When 'Override default answers in this category' is turned ON the following options are available:
 - 'Manual Entry' allows the person to enter his or her own alphanumeric answers. (**Note:** the 'Text' or 'Number' selection determines the keyboard that will pop up).
 - 'Or use Answers' allows you to select a different set of Answers to be used for this category.
 - 'Default answer' (optional): gives you the option to select a default answer for this category.
- **Define Questions:** tap the + sign to add a new question under the category. Enter a description for the question.
- **Live View:** Tap 'Live View' to see how your layout will look. Tap 'Edit View' to go back to the questions.

The screenshot displays a multi-step configuration interface for a service sheet. The interface is divided into several panels:

- Left Panel (Define New Layout):**
 - Short Name: EQUIPMENT_MAINTENANCE_V001
 - Description: HVAC equipment maintenance (v001)
 - Status: Active (toggle)
 - Answers: Maintenance Check
 - Default Answer: Pass, P/A, Fail, N/A, Clear
 - Additional Questions: Equipment Maintenance
 - Customer Signature Required: (toggle)
 - Tech Signature Required: (toggle)
 - Require All Answers: (toggle)
 - Repeat Method: None, Category, Layout, Groups
 - Service Sheet Layout Tips (6 of 10)
- Middle Panel (Define Categories):**
 - Category: Outdoor Units
 - Override default answers in this category: (toggle ON)
 - Manual Entry: (toggle OFF)
 - Or use Answers: Maintenance Check
 - Default answer: Pass, P/A, Fail, N/A, Clear
 - Layouts / Templates: (empty list)
 - Notes: The service sheet requires at least one category. For HVAC, categories could be: General, Electrical, Lines & Pressures. For mechanical repair, categories could be: Inspection, Fluids & Filters, Tests, Cleanup. If no categories are needed, just a category called 'General'. * A category using different answers than defined as the default for the layout will be tagged with an asterisk.
- Right Panel (Define Questions):**
 - Category: While System is Running
 - Questions:
 - Monitor system starting characteristics and capabilities
 - Listen for abnormal noise
 - Search for source of unusual odors
 - Monitor air conditioning and heat pump systems for correct refrigerant charge
 - Measure outdoor dry bulb temperature
 - Measure indoor dry and wet bulb temperature
 - Measure high and low side system pressures
 - Monitor gas furnace for correct line and manifold gas pressure
 - Monitor system for correct line and load voltagamps
 - Category: System Running Test Results
 - Outdoor Air Temperature
 - Indoor Air Temperature

At the bottom, there are buttons for 'Live View' and 'Edit View'.

Now its time to schedule your first Service Sheet

From the Home Screen:

Tap the **'Add'** button on the toolbar at the bottom of the 'Home' screen and select the Layout for the service sheet. Then fill in the information to schedule the service sheet.

- Select the date, time, and customer for the service sheet.
- Select the service tech to perform the work.
- Select 'Additional Questions' (if applicable) from similar closed service sheets. (When available, you can tap on the magnifying glass to bring up a list of closed service sheets that used that same design. You can select one that has the questions filled in and that may work for this service check. This is just to save time and data entry. Any of these answers can be changed on the new service sheet).
- Fill in the additional information. (This can also be filled in once the sheet has been opened).

Tap **'Save & Continue'** to complete the scheduling of the service sheet.

Next, the list of actions/questions for the service sheet is displayed.

These can be answered by:

- Tapping on the selections to the right of the action/question (e. g. Pass, Fail, N/A or Clear to clear your selection etc.) or by typing the answer if it is a numeric or text field.
- To enter specific notes for that action/question tap on the Question to open the 'Add Notes' box.

Buttons on the Toolbar are:

- Print / View / Email service sheet with invoice details.
- Attach up to 20 Photos to sheet.
- View legend for answers.
- Go to page 2.
- Close the service sheet.

Invoice Information: Tap on the Invoice Summary button near the top of the service sheet to view a more detailed invoice summary and add or change the invoice details.

On the Invoice Summary Screen, tap 'Add / Edit Charges' or 'Details' button to view a list of the charges. From this list:

- Tap 'Add' to choose from a list of charges to enter on the Invoice.
- Tap 'Delete' to delete one or more charges.
- Tap a line to change an existing charge.

Tap 'Done' when complete to go back to the invoice summary.

Recording payment: Tap on the Invoice Summary to add a payment or enter a discount %.

- Discount %: enter the discount percentage if applicable.
- Payment Type: enter the type of payment such as check number, cash, credit card etc.
- Payment Amount: Enter the amount of payment.

Closing the Service Sheet: If the Service Sheet is completed tap 'Close Sheet'.

- If all the required information has been gathered for the service sheet, a message will display asking you to confirm that you want to close the sheet. Tap 'Yes' to close the sheet or 'No' to keep the sheet open.
- If the service sheet is incomplete, a message will then display identifying the information that is required to complete it. Tap 'OK' to acknowledge the message. Then go back and enter the required information and tap 'close sheet' when finished.
- When you choose to close the sheet, a second message will display asking if you want to print or email the sheet. Tap 'Yes' to go to the print preview where you can then email or print or tap 'No' to just continue closing the sheet without emailing or printing.

Adding a payment after Service Sheet is closed:

- Select Customers & Service History.
- Select the customer.
- Tap on History.
- Select the service sheet.
- Tap on the Invoice Summary button to add payment and press Done to save.

Using Service Call and Service Sheet

Overview

Old Data Export

The only way to share information in older versions of these apps was to use email to send customers and rates, then to tap and hold the attached file in the email app on the device to install the data into the selected app.

New Connected Apps

The latest versions of these apps now include the ability to share information between the apps without the need for an internet connection. The only requirement is that both apps must be installed on the same device. Once the apps have been installed on the same device and started for the first time, the customers and rates can be exported between the apps. A new service sheet can be created for an existing call, and you can easily switch between each of the apps.

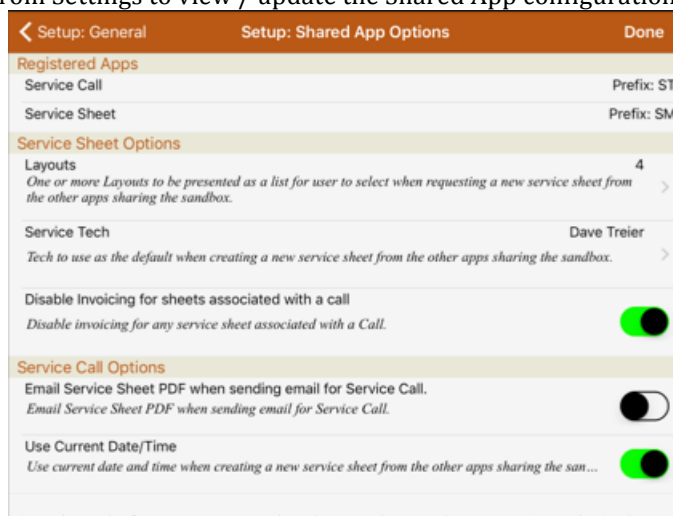

When using the new option on the Actions menu in either app to export data from one app to the other, the second app will automatically load and display the import summary information for the selected export.

Shared Apps Configuration

We recommend the Shared App configuration steps be performed in the Service Sheet app first to reduce extra steps to configure Service Call.

Service Sheet

Select *Shared App Options* from Settings to view / update the Shared App configuration options for Service Sheet.

This screen shot shows the default values for the options.

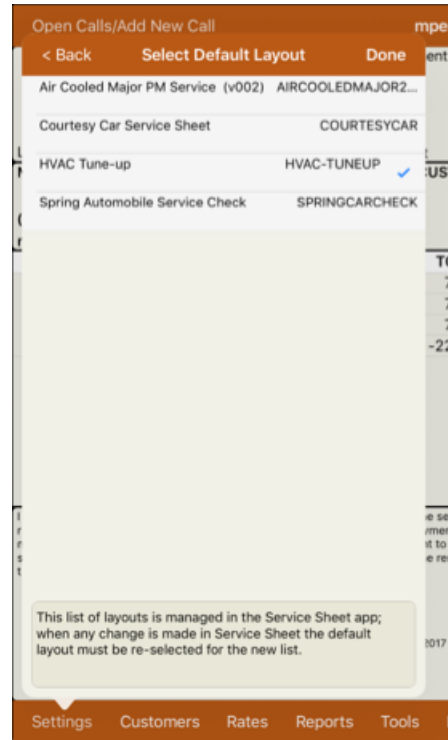

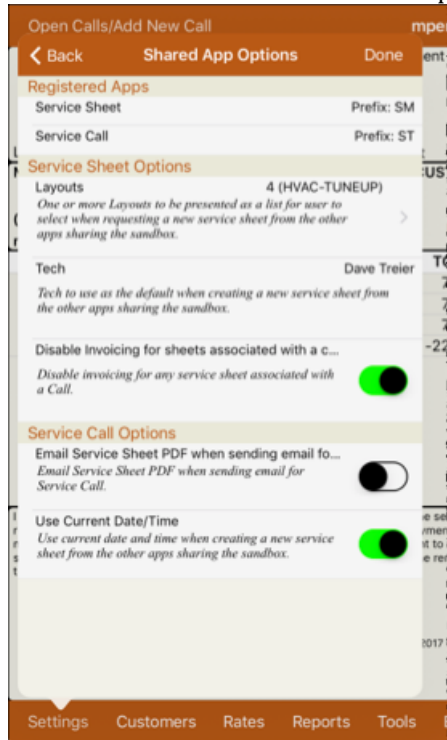

Tap *Layouts* to select the layouts to be visible to the other apps using the shared sandbox. Tap *Service Tech* to select the service tech to be used for any service sheet created from the other apps sharing the sandbox.

We recommend setting the option to disable invoicing for sheets associated with a call since most calls will include charges for the work performed.

If you are using Service Sheet for other activities not related to Service Call, these sheets call can still have charges attached to the sheet.

Service Call

Select *Shared App Options* from Settings to view / update the Shared App configuration options for Service Call. This screen shot shows the default values for the options.

The list of registered apps shows the apps installed on the device with access to the shared sandbox. These apps are designed to share information be used together.

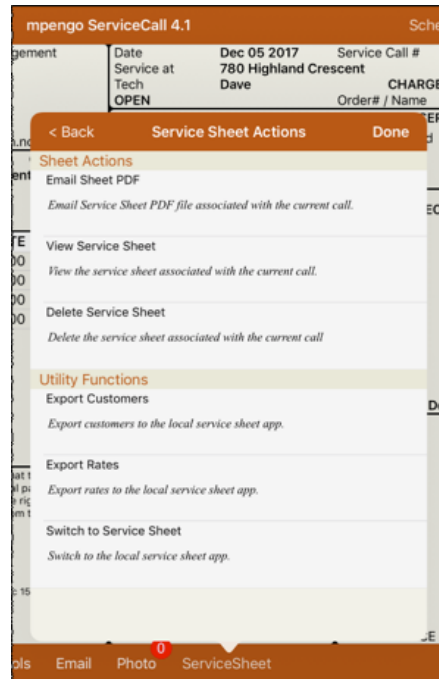

Tap the *Layouts* option to set the default sheet layout to use when creating a new sheet. Once selected, the default layout will display in the list on the Shared App Options page.

Export Data to App

Select the export option for the app you are currently using to push information to the second app. The data will be merged with any that may already exist for the other app.

Service Call

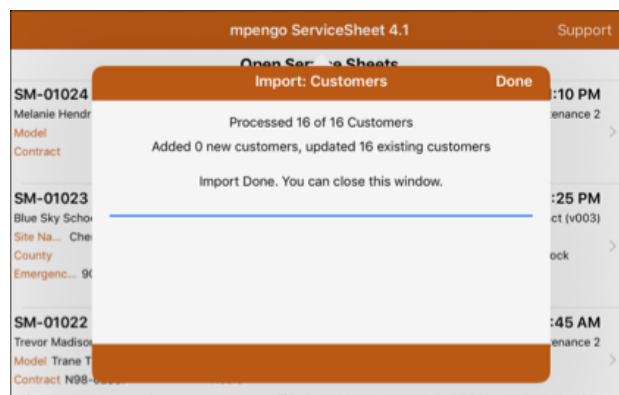

Tap the Service Sheet button on the toolbar to access the list of actions that can be performed from Service Call to Service Sheet.

The *Utility Functions* section of this list includes options to Export Customers, Export Rates, and Switch to Service Sheet.

Service Call – Export Customers

Tap the Export Customers option in the list to begin the process to export the full list of customers from Service Call to Service Sheet. This will trigger an automatic switch to the Service Sheet app and show the Import Customer summary information.

Tap the Done button to close the window and then tap the Service Call button on the toolbar to view the Service Call actions list and select the option to Switch to Service Call.

Service Sheet

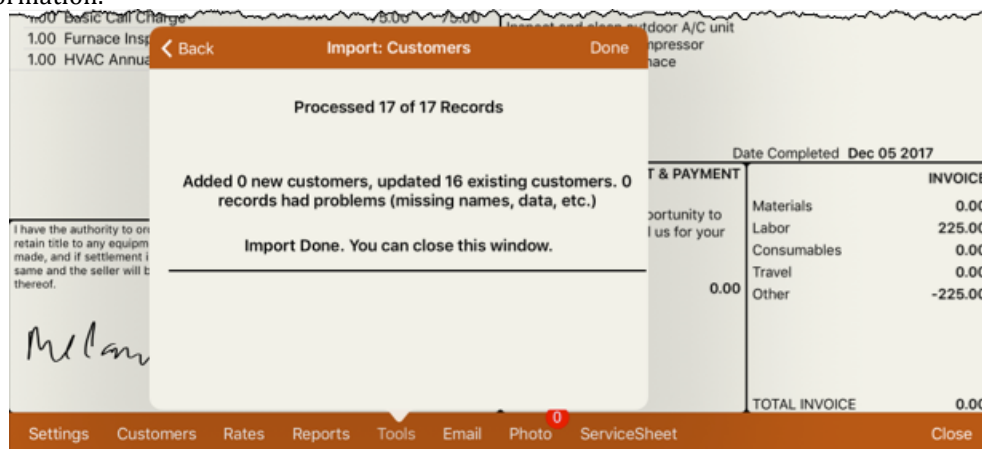

Tap the Service Call button on the toolbar on the Home screen (List of Open Service Sheets) to view the list of actions that can be performed from Service Sheet to Service Call.

The *Utility Functions* section of this list includes options to Export Customers, Export Rates, and Switch to Service Call.

Service Sheet – Export Customers

Tap the Export Customers option in the list to begin the process to export the full list of customers from Service Sheet to Service Call. This will trigger an automatic switch to the Service Call app and show the Import Customer summary information.

Tap the Done button to close the window.

Tap the Service Sheet button on the toolbar to access the Service Sheet actions list and select the option to switch to Service Sheet.

Other Information

A note on Memory: you may encounter memory limitations on your iPad (most iPad's come with 1GB of working memory which is divided up between the internal operating system and your active apps—we're not referring to the 16GB, 32GB, or 64GB storage that you purchased with your iPad - that is data storage). To make the most memory available for ServiceSheet or other apps, close down the apps that are active in the background. Closing down old games and other unused apps will usually free up plenty of memory.

To close apps active in the background

- Double tap the Home button to bring up the multitasking view.
- Swipe or flick up on the screenshot (not icon) of the app you want to exit.
- The app will fly off the screen and release its resources.
- When done, tap the screen with all your icons or double tap the home button.

If you have questions:

If you have any problems or questions, just tap Support, enter a subject, tell us your question, and tap Send. Remember to first indicate your contact name and email in Set Up / Support Info.

You can also reach our support people (who are based in the U.S. and Canada) by sending a direct email to support@mpengo.com.

Our mpengo **Questions & Answers FAQ's** are also available by going to www.mpengo.com and selecting Support.

Happy mpengo'ing!

If you like what you see, help support us by taking a look at some of our other apps that are also geared to provide help for business professionals out in the field – and tell your friends! We'd like to develop more tools suited to your needs, but need your help to spread the word. And send us your suggestions!

A good review on the App Store would also be greatly appreciated!
